

February 10, 2017

Mayor David B. Borge
Municipal Building
24 Main Street
Hoosick Falls, NY 12090

Dear Mayor Borge:

In late 2015, Saint-Gobain Performance Plastics made a commitment to the Village to fund the installation and maintenance of both a temporary and a full-capacity filtration system for the Village's water system. The temporary system has been working for nearly one year and with this week's announcement that the full-capacity, long-term GAC system is now fully operational, we are pleased that our commitment has been fulfilled.

As you know, this pledge preceded the [Consent Order](#) we entered into with the state, and reflects our role as a member of the Hoosick Falls community.

There is still more work to do and we look forward to working with you, your successor and all Village residents.

Sincerely,

Tom Kinisky
